

In response to LPFM possibly taking priority over current FM translator service, I would like to voice my opinion. I am an avid listener of K-Love (90.3, 98.7 and 96.9 in my area). This station is my source of encouragement and education. Due to family demands I am not able to be as involved in my church as I would like to do. K-Love provides me with the opportunity to worship every day of the week from the comfort of my car or home. Many of my friends and family are regular listeners of K-Love and would be very negatively affected by the loss of this station. I know that K-Love has brought individuals back from the brink of suicide and brought hope to many. It is my connection to music and dialog that is nothing but positive. I do not need to worry about what my children are hearing on the radio. K-Love has inspired me to become more involved in my community by reaching out to others in need even when they aren't asking for help. It has encouraged and taught me to be forgiving and how to find peace in difficult times. I honestly would be very distraught by the loss of K-Love. I believe our local community would be negatively impacted by the loss of K-Love because of the encouragement and positive message and music that they broadcast. Please do not give priority to LPFM over FM translator service.
